

P24-2210_EN_19 - REFUSED SCHEME LANDSCAPE & ECOLOGICAL MASTERPLAN (not to scale)

This plan (P24-2210_EN_19) replicates the refused Landscape and Ecological Masterplan (P21-2695_ENV_104A) as set out in the reason for refusal, other than a minor amendment (to panels and fencing within Field 3) to be consistent with the refused Site Layout Plan (WIN-SOL-04-DR-03-04-01 Rev 10)

P24-2210_EN_20 - AMENDED SCHEME LANDSCAPE & ECOLOGICAL MASTERPLAN (not to scale)

- 1 - Development omitted from areas of highest archaeological sensitivity
- 2 - Native hedgerows proposed to edges of solar compound extents to screen views into the development, strengthen landscape character features within the landscape, and improve habitat connectivity for local wildlife
- 3 - Native hedgerows proposed to break down massing of the development, strengthen landscape character features within the landscape, and improve habitat connectivity for local wildlife
- 4 - Fence lines amended to allow access along existing track outside of panel fenced compounds
- 5 - An access track to the north of the hedgerow of solar panel array field 12 has been removed. The proposed access track south of the hedgerow of solar panel array field 12 has instead been extended to the north west to connect with the proposed access to the east of solar panel array field 10. The proposed fencing now also follows the track south of the hedgerow.

Minor amendments to the panel extents have also been made site wide as a result of incorporating additional proposed landscape features. All amendments have been contained within the existing Appeal Site boundary

LAND NORTH OF CANWORTHY WATER - COMPARISON BETWEEN REFUSED & AMENDED SCHEME
